

Kaplan-Meier: Time to Next Purchase by Phase
Log-rank p = 0.0000 (significant at $\alpha=0.05$)

Cox PH Model: Hazard Ratios with 95% CI
(covariates standardized; HR > 1 means higher purchase rate)

Cox Proportional Hazards Model Summary

covariate	coef	exp(coef)	se(coef)	coef lower 95%	coef upper 95%	exp(coef) lower 95%	exp(coef) upper 95%	cmp to	z
lagged_cong_hits	0.0218	1.0221	0.0161	-0.0097	0.0533	0.9904	1.0548	0.0	1.3579
